PROFESSIONAL SUMMARY

Product-minded technical builder with a background in Computational and Data Science, combining software engineering with a strong user-centric mindset. Experienced in AI prototyping, prompt engineering, and translating data-driven insights into optimized workflows. Skilled in analyzing user friction, coordinating cross-functional teams, and structuring product requirements for AI-first platforms.

SKILLS & COMPETENCIES

- **Product & Collaboration:** Product Thinking, Rapid Prototyping, Feature Prioritization, Agile/Scrum, Sprint Planning, UI/UX Principles, Cross-functional Collaboration
- **AI & Analytics:** Prompt Engineering (LLMs, API Integration), Data Analytics (Pandas, NumPy, Plotly), Streamlit Dashboards, Predictive Modeling
- **Development & Technical Execution:** Java, Python, SQL, REST APIs, MySQL, PostgreSQL, Data Structures & Algorithms
- **Tools & Platforms:** Jira, Git/GitHub, Postman, Docker, Vercel, Render, Tableau

PROFESSIONAL EXPERIENCE

INFLYNX Technologies

Data Analyst Intern

Bhubaneswar, India

Oct 2025 – Dec 2025

- **Workflow Analysis:** Evaluated user pain points and system delays on a farm produce logistics platform, identifying transaction bottlenecks to optimize API response times by 15% for field operations.
- **User Role Design:** Coordinated closely with the engineering team to design and deploy secure, role-based authorization layers, streamlining account creation and admin workflows for regional managers.
- **Operational Scalability:** Modeled structured relational database schemas managing over 1M+ active shipment records, defining data pathways that improved retrieval efficiency and enabled operational analytics.

PROJECTS & LEADERSHIP

ToneShift – AI Email Tone Rewriter — React, Spring Boot, PostgreSQL, OpenRouter AI, Vercel [\[LINK\]](#)

- **Product & UX Ownership:** Designed and deployed an end-to-end AI communication tool that converts email drafts into Formal, Professional, or Friendly tones based on user personas.
- **AI Prototyping & Iteration:** Conducted rapid prototyping and prompt-tuning via OpenRouter LLM API, reducing output variance and optimizing prompt structures to achieve an average response latency of < 2 seconds.
- **Performance Optimization:** Analyzed latency feedback and implemented targeted database index strategies and query optimizations, improving total platform performance by 30%.

TRADECOM – AI Stock Analytics Platform — Python, Streamlit, Pandas, Plotly, Yahoo Finance API [\[LINK\]](#)

- **User Experience (UX) Translation:** Conceived and launched a web-based financial analytics dashboard to simplify volatility assessments and portfolio backtesting for retail investors.
- **Friction Reduction:** Translated complex mathematical concepts (expected returns, volatility risk, Sharpe ratio) into interactive Streamlit visualization workflows, enabling users to perform portfolio simulations with a single click.
- **Feature Development:** Built automated data-fetching pipelines via Yahoo Finance API to enable direct backtesting of a simulated \$10K investment, providing retail investors with structured, visual evidence to guide investment strategy.

PROJECT LEADERSHIP

EPICS Social Innovation Project

Product Lead (Team of 10)

- **Sprint Leadership:** Led Agile sprint planning and progress tracking for a 10-member team, coordinating timelines, stand-ups, and milestone execution to ensure on-time delivery.
- **Backlog Management:** Gathered stakeholder feedback and translated community pain points into prioritized user stories and feature requirements for the sprint backlog.

EDUCATION

Vellore Institute of Technology

Integrated M.Tech in Computer Science (Computational and Data Science)

CGPA: 8.69 / 10.0

Graduation: 2027

Ebenezer Higher Secondary School

10+2 (Intermediate) – CBSE Board (Score: 93.8%)

Gwalior, MP, India

Graduation: 2021
